

AA-59569 Silver Plated Copper Flat Braid

Made in compliance with MIL-SPEC QQ-B-575 (as revised). Braid is formed so as to maintain coverage of 90% shielding, (70% for 0.78 and smaller), over the nominal diameters specified.

Silver Plated: Individual wires are silver plated copper wires, conforming to ASTM B298 standard, with 40 micro inches minimum of silver plating. Excellent for use at temperatures exceeding 200°C or where special resistance to corrosion is required

Blake Part Number	Nominal Inside Diameter (inch)	AWG of Individual Ends	Carriers	# of Wires Per Strand	Total # of Individual Ends	Approximate AWG Equivalent	Approx. Current Carrying Cap. (amps)
